

SGreports Filter setup for Wowza Stream Names

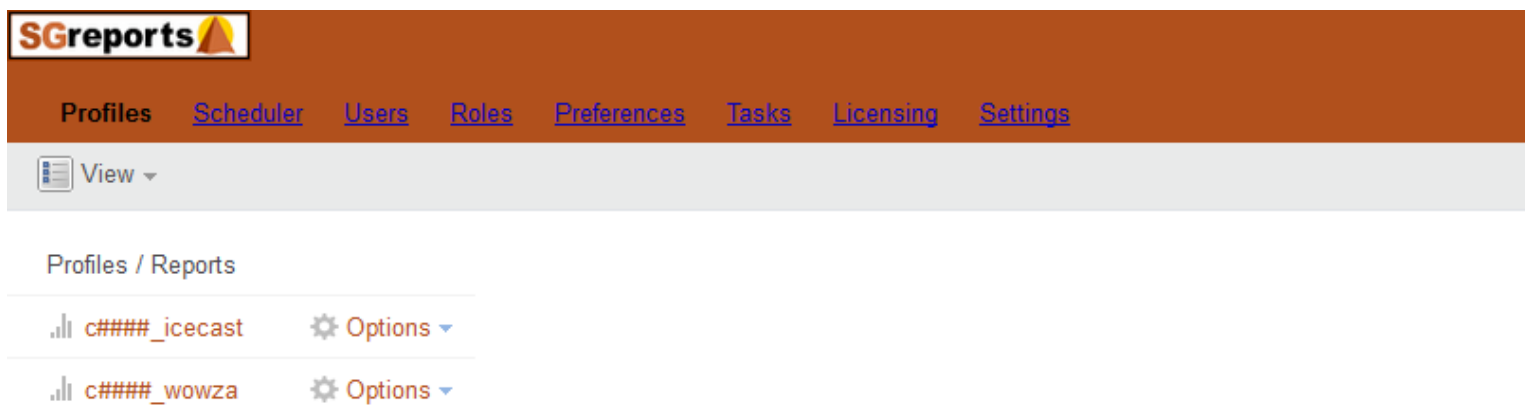

This tutorial goes over setting up a filter for a Wowza stream name with SGreports. If you have any questions, please contact support@streamguys.com.

Please note: The accuracy of your reports depends on how well you filter for your target population (e.g. your audience).

If you would like to setup a duration filter for short accesses (e.g. < 90 secs), please see [SGreports Filter Setup for Play Duration.pdf](#).

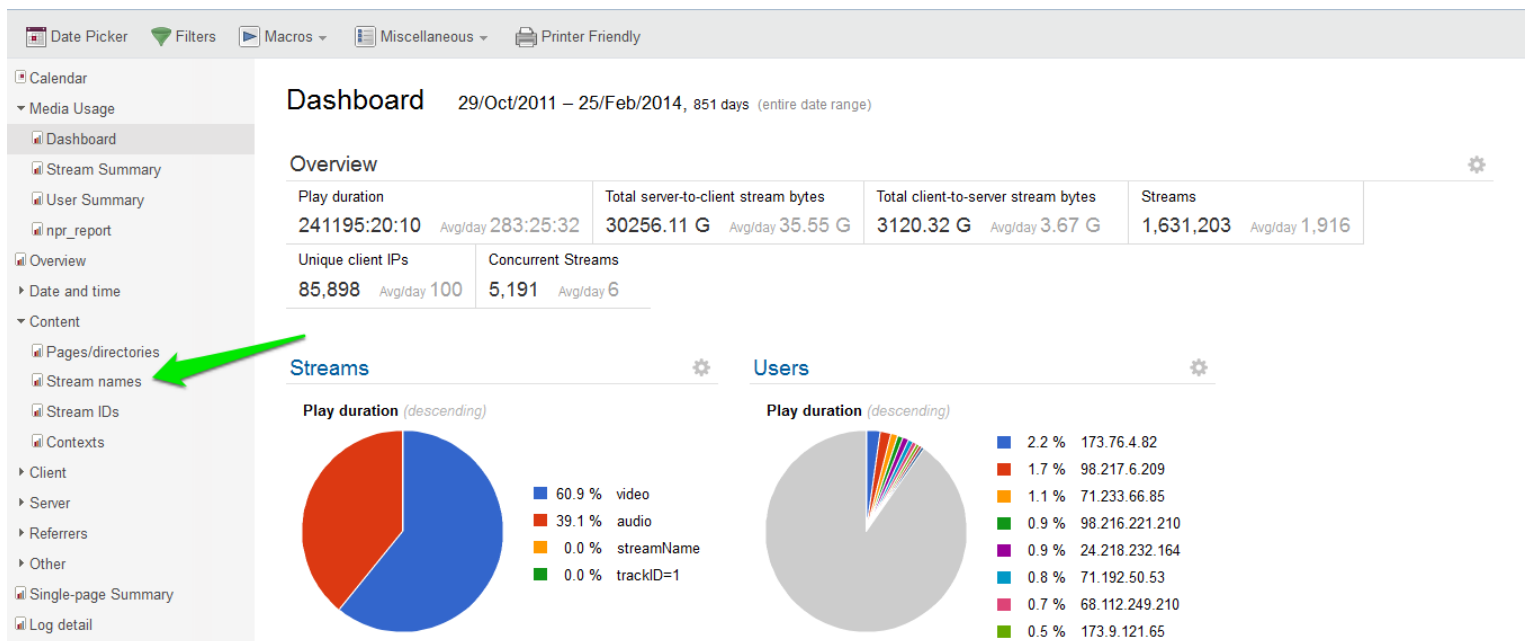

To have all announcements, prerolls, and Adswizz insertions filtered out as well, please contact support@streamguys.com about setting up a SGreports playlist profile.

Log into your SGreports manager, and select your respective Wowza profile.

Your Dashboard will automatically load. *

In the left column, expand the Content menu item, and select Stream names.

* Please see [Sgreports_Filter_Setup_for_Wowza_Stream_Names_\(non-graphic\).pdf](#), if there is no Dashboard.

In the Stream names window, select the zoom icon next to the stream name(s) you are filtering for. This will light up a blue dot next to your selected Stream names.

Select Filters from the top menu bar.
