

## SGreports Wowza ATH (Aggregate Tuning Hours)

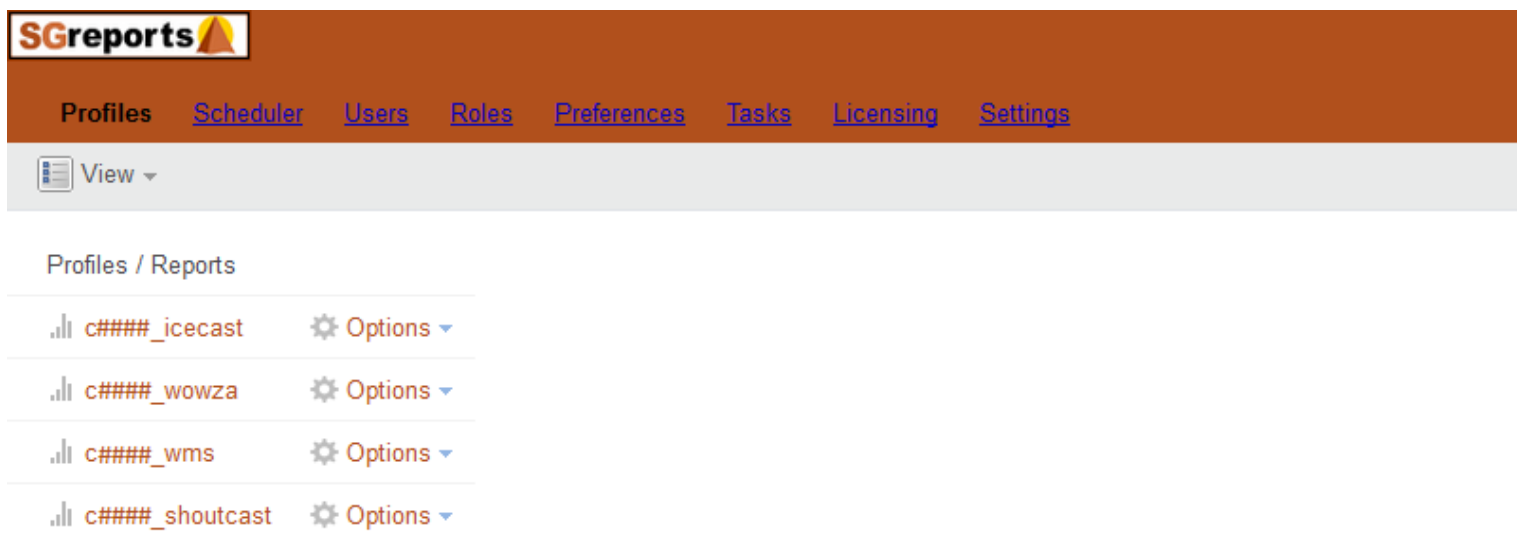

This tutorial goes over creating a report to find the ATH for Wowza with SGreports. If you have any questions, please contact [support@streamguys.com](mailto:support@streamguys.com).

*Please note: The accuracy of your reports depends on how well you filter for your target population (e.g. your audience).*

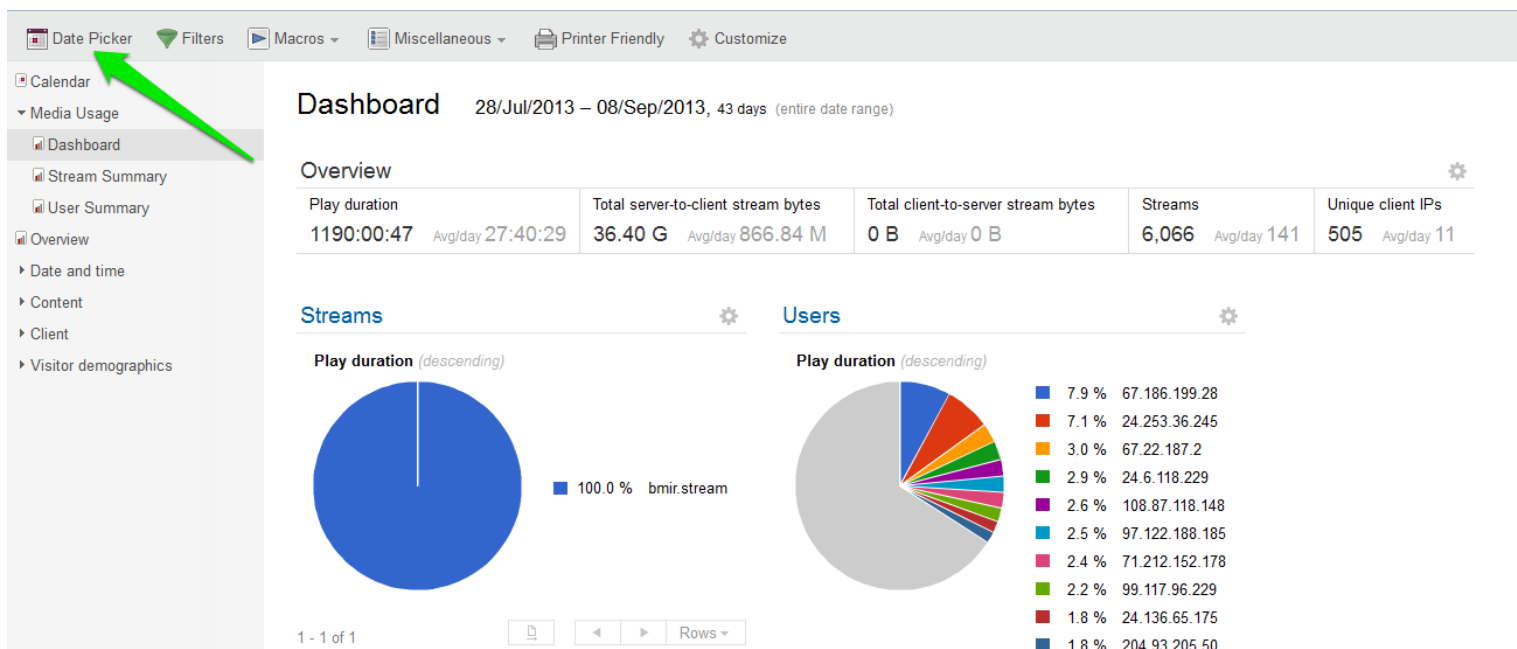

*For instructions on filtering, please see the [Filters](#) section of [SGreports How-Tos \(Downloadable PDFs\)](#).*

*To have all announcements, prerolls, and Adswizz insertions filtered out as well, please contact [support@streamguys.com](mailto:support@streamguys.com) about setting up a SGreports playlist profile.*

Log into your SGreports manager. Select your respective Wowza profile.

This will take you directly to the Overview section. Click the Date Picker on the top left to select the date-range for the ATH.

Click the Date Picker on the top left to select the date-range for the ATH.

1. Click on “Date or Start Date” and select the beginning date for the date-range. \*
2. Click on “End Date” and select the last date for the date-range. \*
3. Click the Apply button.

\* Please note: Each field must have a value.

The Date Picker dialog box has four tabs: "Date or Start Date", "End Date", "Relative Date", and "Custom". The "Date or Start Date" tab is active. It contains a date input field showing "01/Oct/2013", a "Clear" button, and a calendar grid. The calendar grid shows the month of October 2013, with days 1 through 31. A green arrow points from the "Date or Start Date" tab to the date input field. Another green arrow points from the "End Date" tab to the calendar grid. A third green arrow points from the "Apply" button to the "Date or Start Date" tab.

Your Dashboard will now show the Overview report for your selected date-range. The Play Duration is your ATH.

## Dashboard

28/Jul/2013 – 08/Sep/2013, 43 days

### Overview

Play duration	Total server-to-client stream bytes	Total client-to-server stream bytes	Streams	Unique client IPs
1190:00:47 Avg/day 27:40:29	36.40 G Avg/day 866.84 M	0 B Avg/day 0 B	6,066 Avg/day 141	505 Avg/day 11
